SharedSpace

# INTRODUCTION

Meet "SharedSpace", your ultimate shared living assistant. With features that include task management, budget division, and landlord communication, this app streamlines co-living, making it hassle-free, organized, and more enjoyable for everyone in your shared apartment.

SharedSpace

# PROBLEM

This app solves the complexities of shared living, including the distribution and tracking of household tasks, equitable division of costs, and efficient communication with the landlord. It effectively removes misunderstandings and inefficiencies, making shared living a harmonious experience.

# TARGET MARKET

individuals involved in shared living situations. This can encompass students, young professionals, or anyone who is sharing a living space and looking to simplify the management of shared tasks, finances, and communications. It could also extend to property owners or managers who operate shared living spaces and want to ensure a smooth operating environment for their tenants.

# SOLUTION

Our app, provides an all-encompassing solution for shared apartment needs. It efficiently manages shared tasks, aids in searching for potential roommates, facilitates direct reporting of faults to the property owner, and simplifies the splitting of expenses among roommates, ensuring a harmonious co-living experience.

## SPLIT OUTCOMES

With SharedSpace, you can effortlessly split shared expenses equally among roommates. It automatically calculates and displays each person's share, eliminating financial disputes and fostering a harmonious living environment.

## FINDING ROOMMATE

SharedSpace streamlines the process of finding a new roommate. It allows users to create and share room availability ads within a trusted network including internal chat, making the search for compatible roommates quick, secure, and efficient.

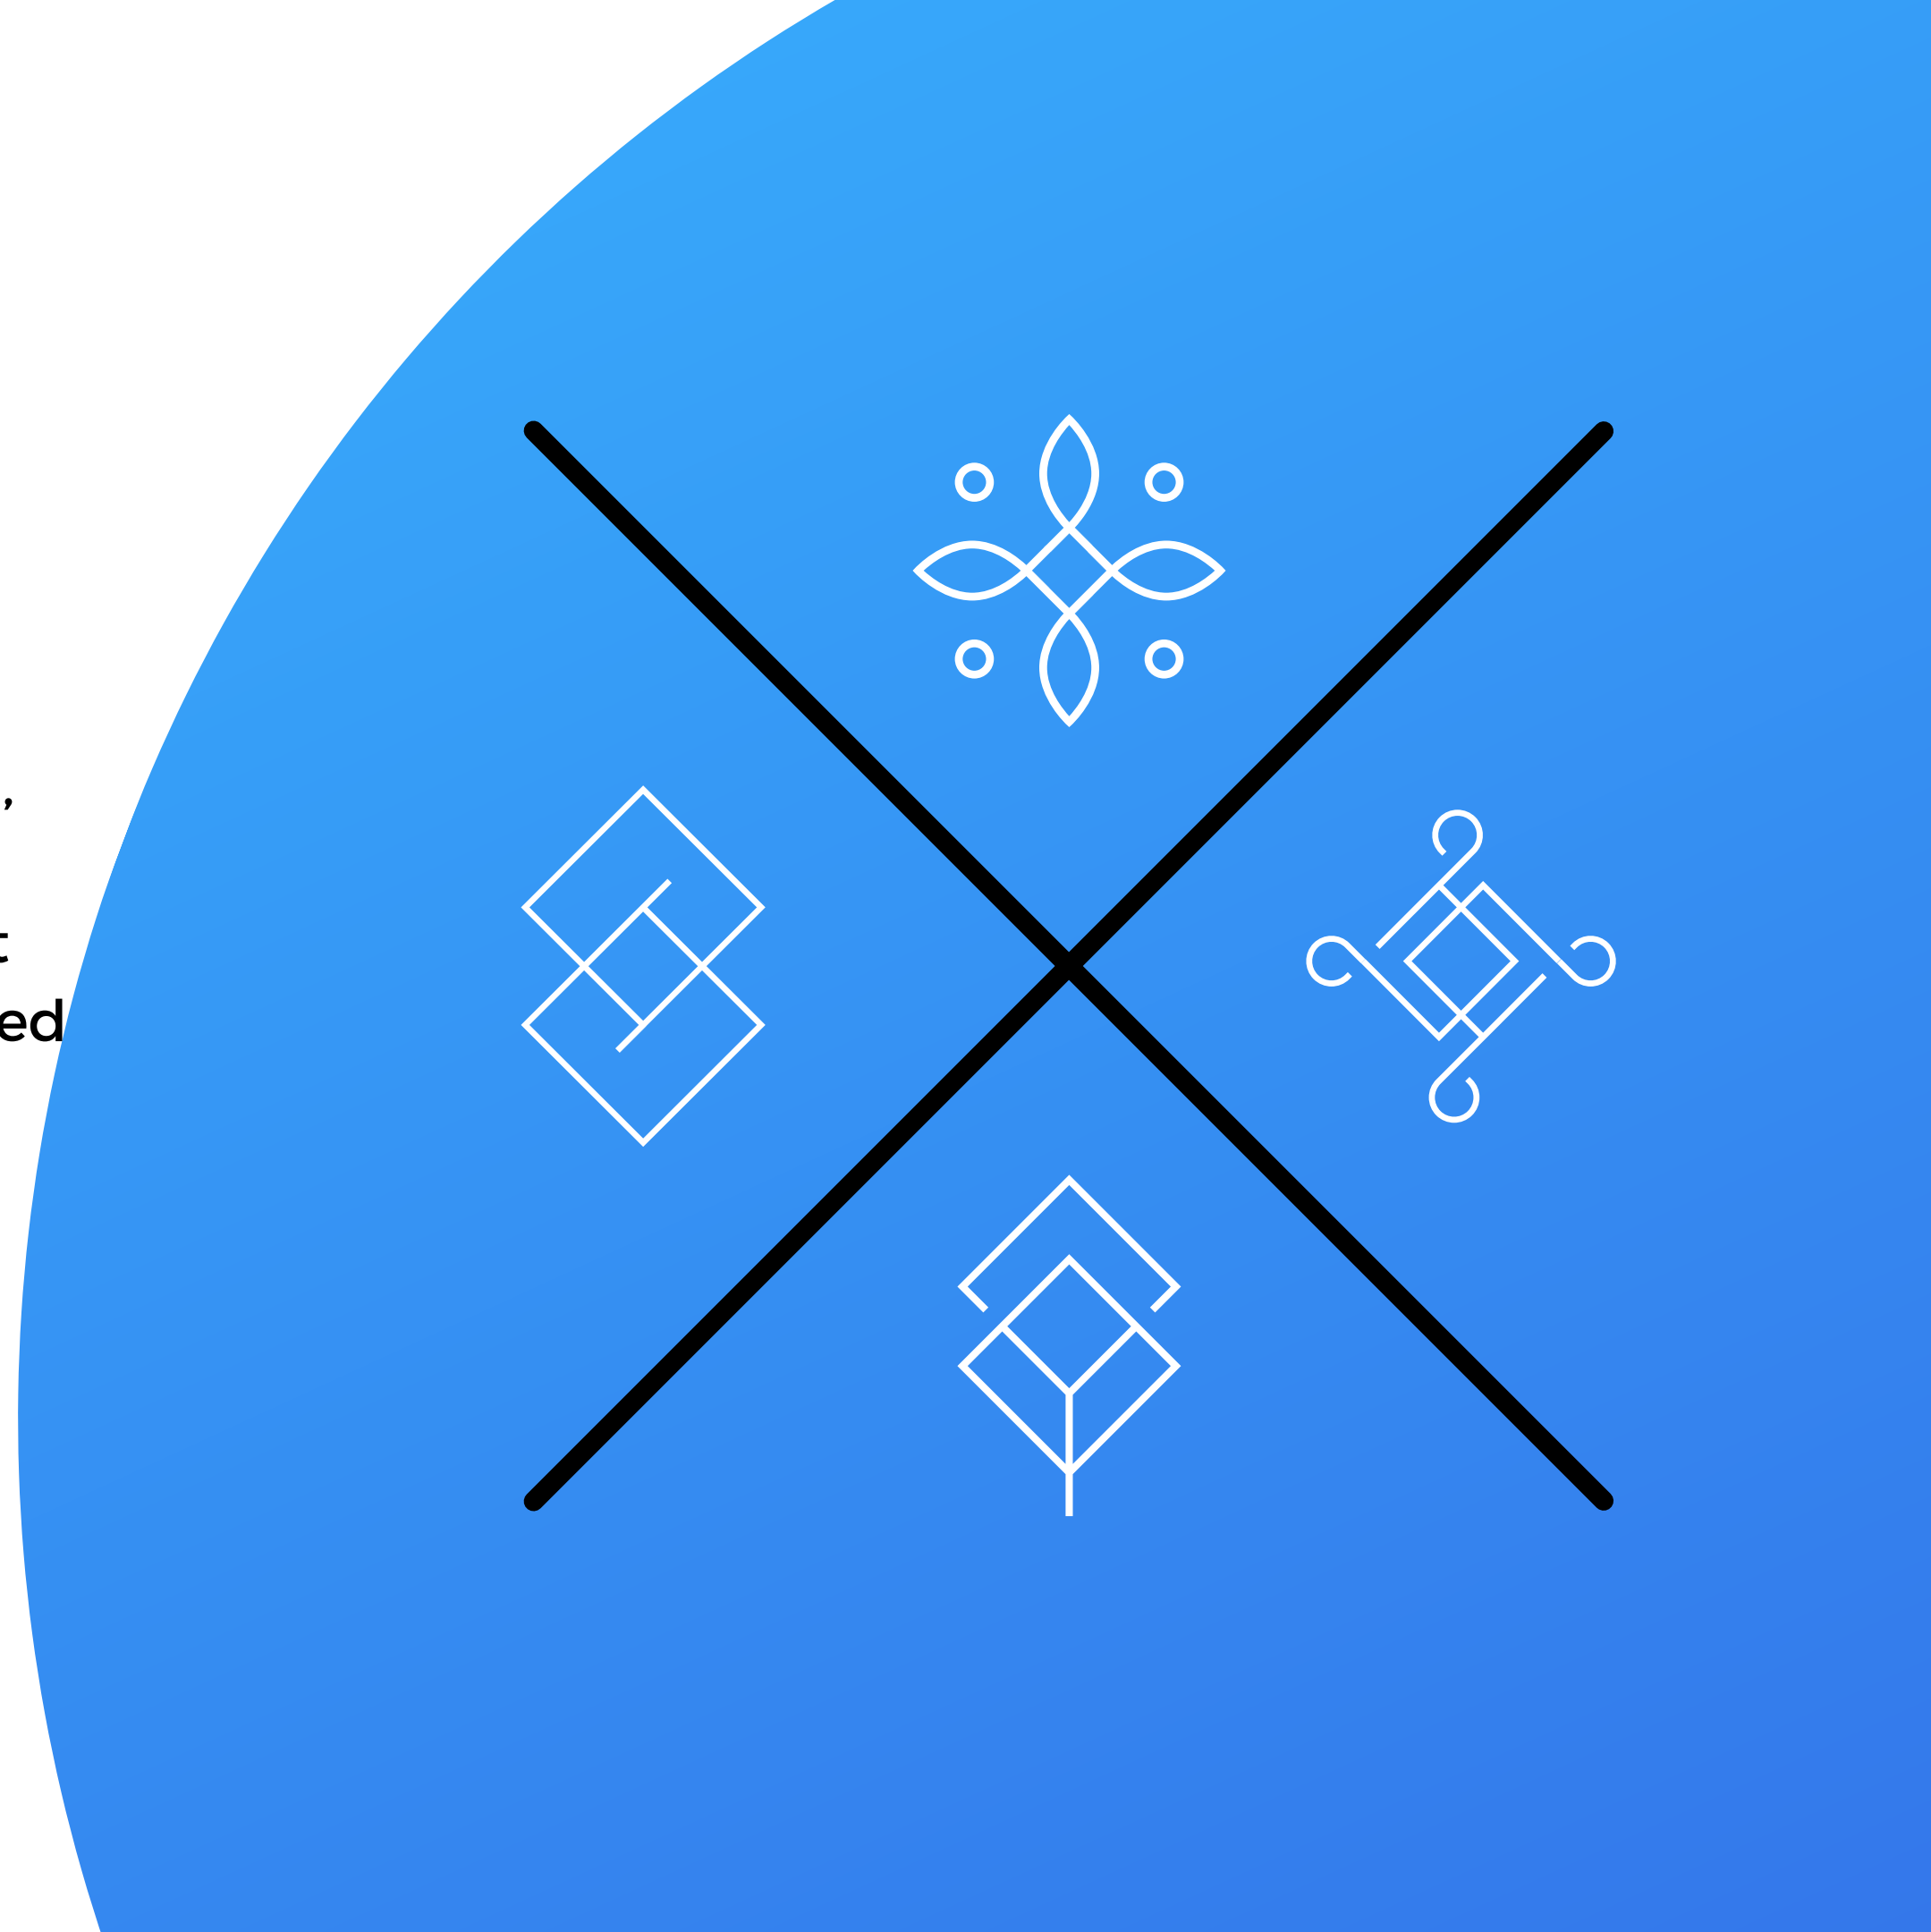

## MANAGE SHARED TASKS

Managing shared tasks becomes a breeze. You can assign chores and track progress, ensuring equitable distribution and timely completion of all household duties.

# MARKET COMPETITION

Our main competitors are Monday, SPLITWISE, and Doron, they are all good but only in a very specific field, for example Doron is excellent at finding apartments, but not at managing shared apartments

# OUR TEAM

Meet Lior, Shir, and Ido - computer science students from Tel Aviv-Yafo Adamic College. All three juggle demanding high-tech jobs alongside their studies. Through their personal experiences, they've encountered various challenges in managing shared apartments. Together, they're seeking a solution to simplify the complexities of co-living.
