Introduction

BuildIn – A mobile app for co-living management.

Co-living can be an amazing experience, but it can also come with its own set of difficulties.
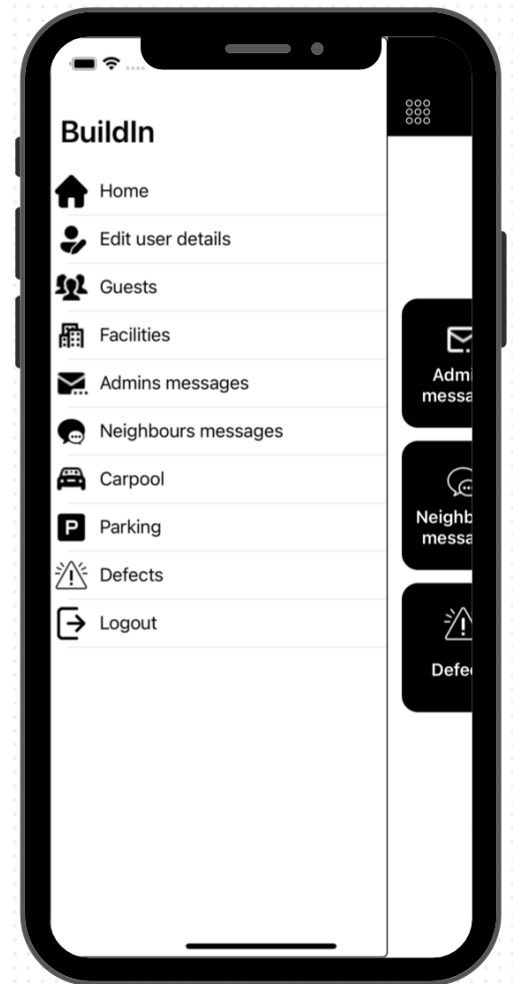

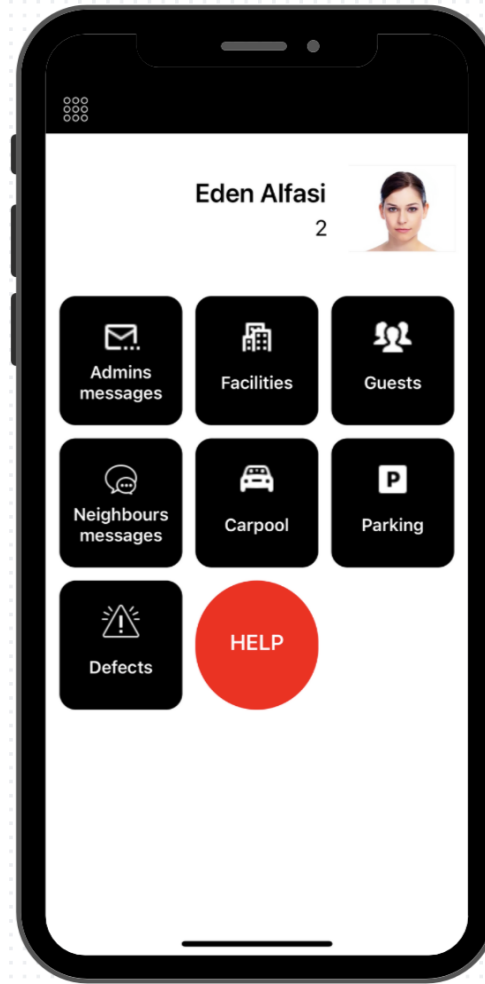

From defect tracking, managing facilities to coordinating carpool and parking sharing.

Our mission is to simplify the lives of residents and property managers by providing a comprehensive solution to the challenges of co-living.

That's where BuildIn comes in - our platform offers a streamlined approach to co-living management that makes life easier for everyone involved.

Key Features

- Facilities booking

- Defects reporting & tracking

- Parking sharing

- Carpool

- Management announcements

- Tenant's massages

- Guest management

- Help button

- And more...

Content

2 Users types:

- Platform for admin

- Platform for tenant

*** 7 micro-services**
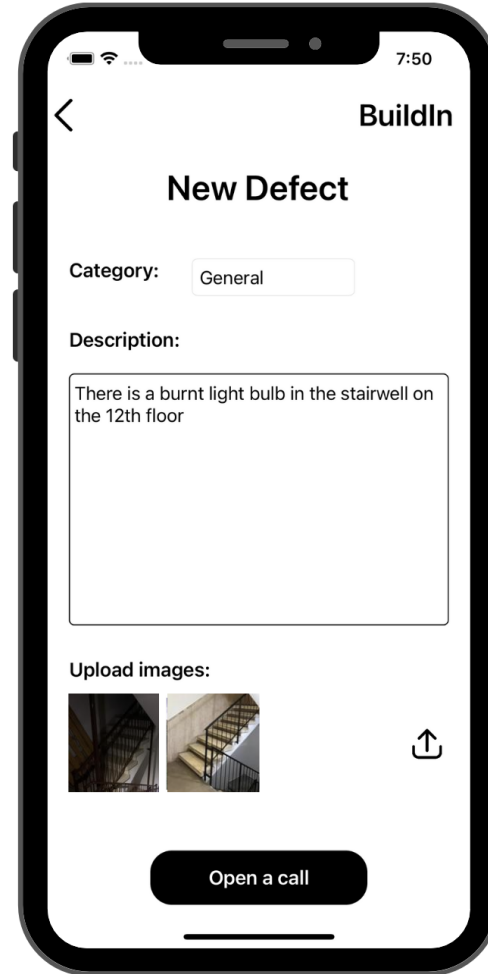

* More than 120 endpoints!

Facilities Booking

Easily manage building facility bookings, ensuring smooth control and organization of amenities.

Defects Reporting & Tracking

Report and track building defects

for streamlined management

and resolution.

New Defect

Category: General

Description:

There is a burnt light bulb in the stairwell on the 12th floor

Parking Sharing

Effortlessly share parking spaces among tenants for optimized building management and convenience.

Carpool

Enhancing sustainable commuting options, residents can easily connect and organize shared rides with the carpool feature, reducing traffic congestion and promoting eco-friendly transportation within the community.
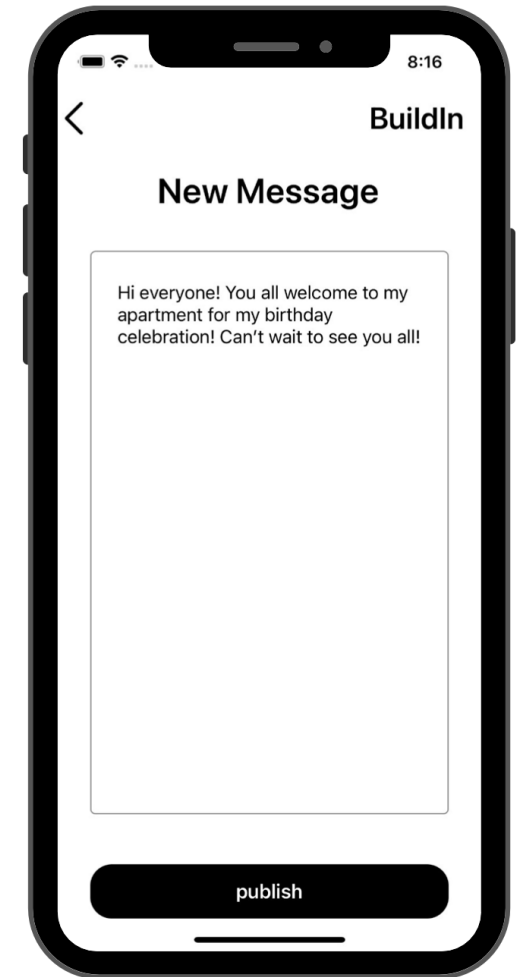

Management Announcements

Building administrators can efficiently disseminate information and updates by leveraging the management messages board, ensuring that all residents receive essential announcements promptly.
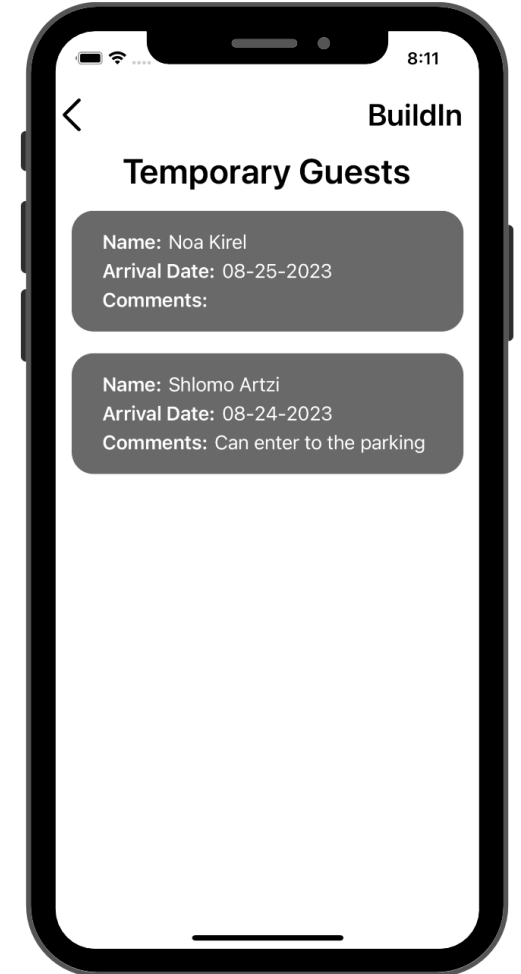

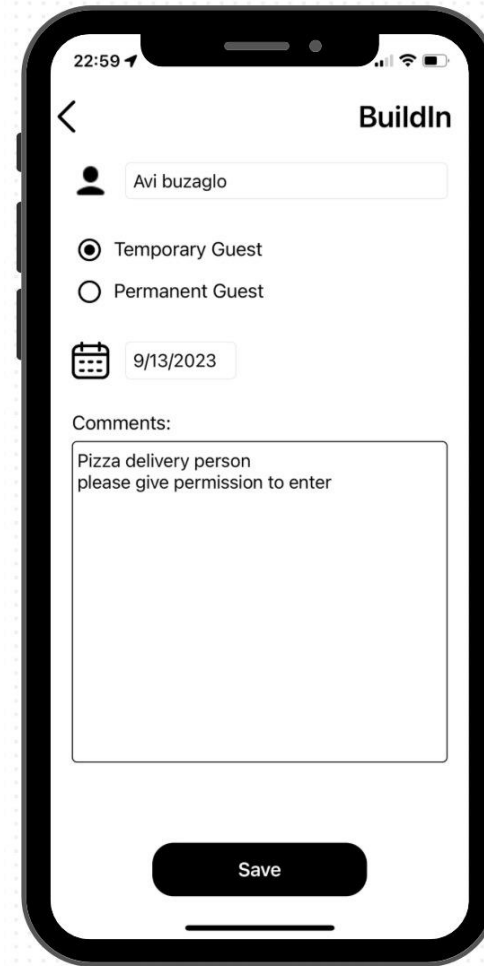

Tenant's Massages

Allow seamless communication between tenants through individual building group chats, facilitating easy and efficient information exchange within the residential community.
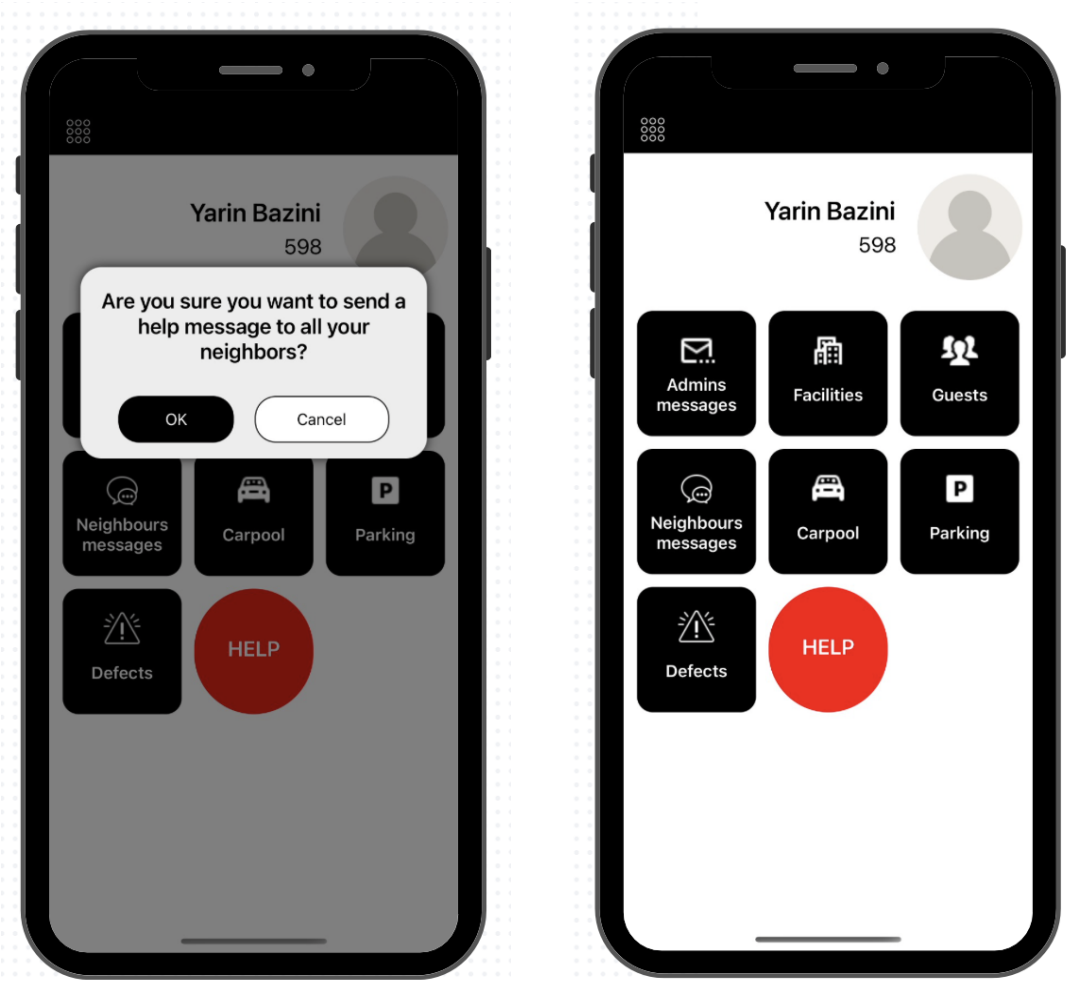

Guest Management

Simplifying guest management, tenants can register their visitors and grant them authorized access to the building, enhancing security and streamlining the visitor check-in process.

Help Button

Enabling tenants to signal for help during emergencies, triggering an immediate alert to all residents for prompt assistance.
